

Electrification and Power

Course Name

Diesel Generator Maintenance

Course Description

This course is designed for any person who is required to conduct maintenance, repair or testing of fixed and mobile generators on Network Rail controlled infrastructure.

This course covers generators which are typically used in:

- signalling power supply applications or
- essential services.

This course is currently delivered externally on behalf of Network Rail by Power Electrics and booked through the NR system.

Audience

This person is most likely to be in a team member role and will be responsible for the maintenance and repair of diesel generators. The line manager should determine the individual's suitability to attend this course. Apprentices may attend this course if they are in the final year of the Network Rail D&P; Apprenticeship and will be booked by the Apprentice team.

Duration: 3 Day(s) **Class Size:** 6
