

Health and Safety

Course Name

Internal Auditor ISO 45001

Course Description

Learn the practical steps involved in performing an internal audit of occupational health and safety management systems (OH&SMS) against ISO 45001 on this 2-day training course. The course provides the knowledge and skills to plan, conduct, report and follow up an OH&S audit, through case studies and interactive workshops. Delegates will also learn to go beyond simply assessing compliance to evaluate the effectiveness of a process and identify opportunities for business improvement. Delegates are assessed on the course through continuous evaluation.

The topics covered by the course include:

- background to OH&SMS
- auditing
- clauses of the standard
- audit planning – OH&S risks
- OH&S hazards
- audit planning
- audit preparation and checklists
- audit techniques
- nonconformity, reporting and corrective action
- nonconformity writing
- the auditor
- audit close out
