IT & Systems

Course Name

iOS Digital-Upskilling

Course Description

Tailored for colleagues in every role at Network Rail, our iOS Digital Up-Skilling course is designed to elevate your knowledge and everyday use of the hardware and software of our mobile devices, whether in an office or out on the track. This is a bespoke course, addressing your specific requirements, whether it is the use of Network Rail applications and software or just general use and familiarisation of an iPad or iPhone. Discuss your needs with your local RTSM and we will design the course bespoke for your cohort. As the IT Training Team within Network Rail, we pride ourselves on our ability to provide bespoke solutions tailored to meet your individual IT needs. Whether you require one-to one or closed cohort training, face to face or virtual, we understand the importance of addressing your specific requirements. Our dedicated team of experts possesses in-depth knowledge of Network Rail's IT systems and can deliver training sessions that align precisely with your job roles and responsibilities. We are committed to ensuring that you receive the highest quality training experience, empowering you to enhance your IT skills and proficiency. With our personalised approach, we guarantee that you will receive the support and guidance necessary to excel in your IT endeavours
