

Railway Operations

Course Name

An Introduction to Level Crossings (LX)

Course Description

This training course is designed to give you an insight into the most common types of level crossings that are in use on the rail network.

There are also 3 optional modules that you can chose to complete based on the types of level crossing you might find in your area. These are:

- An introduction to user worked crossings
- An introduction to controlled crossings
- An introduction to automatic crossing

This course will not award a competence.

Audience

Operational Staff

Duration: 0.25 Day(s) **Class Size:**
