

Elearning

Course Name

Asbestos Awareness (elearning)

Course Description

Awareness training on the dangers of asbestos, including awareness of the possible health effects linked to the inhalation of airborne asbestos fibre, how Network Rail manages asbestos within its assets, why Network Rail has a responsibility for reducing exposure to asbestos risk, and what to do when asbestos material is suspected on Network Rail site.

Audience

This course is aimed at anyone who has the potential to disturb asbestos while undertaking their normal duties, those planning such works and other decision makers that have the potential to influence such work delivery. It is mandatory for all persons working within the functions of Infrastructure Projects, Maintenance, Network Operations, Operations, (including Signallers), Route Services, Buildings and Civils and Property. This awareness programme is also available for all our employees.

Duration: 0.25 Day(s) **Class Size:** 1
