Elearning

Course Name

Data Protection Essentials

Course Description

This course provides a good grounding in the principles of data protection. At Network Rail we manage large amounts of personal information and we all have a responsibility to handle this in a fair, accountable and safe way. From May 2018, the General Data Protection Regulation or GDPR - will provide greater protection for individuals' personal information along with more responsibility for organisations holding it. So it's important we know what to do.

Audience

All Network Rail employees.

Duration: 0.25 Day(s) **Class Size:** 1
