

Signal Engineering

Course Name

ETCS System Fundamentals 2 - System Version Management

Course Description

System Fundamentals 2 builds on the information provided in the System Fundamentals 1 suite of learning, covering some of the topics already addressed in more detail, as well as providing information geared to supporting project delivery teams. This course will be useful to a range of technical roles working on an ETCS scheme but in particular Project Engineers and Test and Commissioning engineers. The fourth section of the course, System Version Management, aims to provide a recap of System Versions covered in System Fundamentals 1. Following this, the learning will discuss the management of System Versions in more detail.

Audience

Scheme Designers Project Engineers Test and Commissioning Engineers Other technical roles working on ETCS schemes

Duration: 1 Day(s) **Class Size:**
