

Signal Engineering

Course Name

Installation and Maintenance of Rail Mounted Mechanical Treadles

Course Description

This training course is designed to provide delegates with the knowledge and theory associated with Installation and Maintenance of Rail Mounted Mechanical Treadles.

Upon completion of the eLearning you will be required to pass a theory assessment, after which you will then be awarded Installation and Maintenance of Rail Mounted Mechanical Treadles (Sig 41.01) competence at Level 2.

To uplift to Level 3, a period of action learning is required.

Audience

Persons who are required to team leaders, technicians and operatives within the maintenance organisation. The solution will also be of relevance to signal works testing staff.

Duration: 0.25 Day(s) **Class Size:**

Competence Name Awarded

Treadles Core. Undertake corrective and preventative maintenance, replacement and installation of rail mounted mechanical treadles

Competence Awarded

Sig 41.01

Course Code

Sig 41.01

Prerequisite Name

Treadles Core

Prerequisite Short Code

Sig 41

Skills Assessment Scheme Regime

5
