

Further Leadership and Management modules

Course Name

Leadership Essentials: Planning & Problem Solving (Infrastructure Workforce)

Course Description

This course provides the knowledge and skills to identify practical planning tools and approaches, manage your own and your teams' time, establish how to reduce the likelihood of things going wrong, and how to preserve asset integrity. It also covers how to decide whether an issue needs to be escalated, the escalation process, and how to use basic problems solving and decision making criteria in making decisions.

Audience

This programme is designed for those individuals who are Team Leaders and want to develop a clearer understanding of planning and problem solving in their role.

Duration: 1,5 Day(s) **Class Size:** 14
