

Railway Operations

Course Name

See, Check and Notify (SCaN)

Course Description

This See, Check and Notify (SCaN) eLearning was developed by the National Security Protective Agency to help businesses and organisations maximise safety and security using their existing resources.

People working within an organisation are the biggest advantage in preventing and tackling a range of threats, including criminal activity, unlawful protest and terrorism.

This SCaN training empowers you to correctly identify suspicious activity and know what to do when you encounter it.

In addition to this, the skills learnt will help you provide an enhanced customer experience. It helps ensure that individuals or groups seeking to cause harm are unable to get the information they need to plan their actions.

This course is formed of 1 module for all staff, and 1 additional modules for line managers.

Audience

This course is intended for those working within Station Operations, however this will also benefit those who wish to have a greater understanding of identifying suspicious activity in public and in the workplace.

Duration: 30 Minutes Day(s) **Class Size:** N/A
