

Regime 5 (Low Risk)

A – Initial Development (Training)

Approved Trainer delivers the initial training.

Individual successfully completes a knowledge and practical assessment.

B – Action Learning

There is no formal requirement to complete Action Learning for regimes 5, but is to be considered where:

- the individual is newly trained; **and**
- the asset, system or subsystem is complex in its operation or application; or
- the individual's experiences new environmental conditions; or
- the individual's behaviour indicates additional support would be beneficial to their development, for example, building confidence training

C – Interim Checks (ACC)

Line Manager confirms in discussion with **Individual** that the competence is still required, is being practiced at the prescribed frequency and that quality and safety standards are being met.

D – Renewal of Capability (Safe Performance and Test)

Skills Assessor reviews evidence of safe performance such as Supervisor feedback. **Individual** must also demonstrate knowledge either via computer based knowledge test or professional discussion.

Low risk

The ongoing maintenance of these competences involves evidence of safe performance and a test of knowledge. Stages **C** and **D** cycle to confirm ongoing competence.

Validity period:

48 - 60 months.
