

# Regime 6 (Lowest Risk)

## A – Initial Development (Training)

**Approved Trainer** delivers the initial training. In some cases this can be delivered by a **Competent Person** as part of a formal briefing.

## B – Action Learning

There is no formal requirement to complete Action Learning for regimes 6, but is to be considered where:

- the individual is newly trained; **and**
- the asset, system or subsystem is complex in its operation or application; or
- the individual's experiences new environmental conditions; or
- the individual's behaviour indicates additional support would be beneficial to their development, for example, building confidence training

## C – Interim Checks (ACC)

**Line Manager** confirms in discussion with **Individual** that the competence is still required, is being practiced at the prescribed frequency and that quality and safety standards are being met.

### Lowest risk

The ongoing maintenance of these competencies is via the ACC based on regular safe performance. Stage C cycles to confirm ongoing competence.

**Validity period:**  
50 years.
